

Thank You, Roger

The 2006 Surface Transportation Program Book is the thirteenth published under the direction of Project Scheduling and Program Management Engineer, Roger Winkelhake. Under his guidance, the "Program Book" has evolved in form and content to the valuable resource that it is today.

Roger has decided to call this edition his last, and by the time this book is released, he will be pursuing his non-work interests and hobbies full time in retirement.

During Roger's 43 years at the Department of Roads, his integrity, dedication and work ethic have set the standard for all those who have crossed his path.

The Nebraska Department of Roads, and our many partners in transportation, would like to express our sincere appreciation for a job well-done and convey our best wishes for a happy retirement.

Roger Winkelhake
