REVISED:

Section 26

Building Materials

Inspection of buildings involves checking many items that are not normally encountered in the inspection of highway work. Any questions concerning building inspection should be directed to the Highway Architect of the Roadway Design Division (Rest Area buildings) or to the Architecture Section of the Capital Facilities and Transportation Services Division (all other buildings).

Upon project completion the Project Manager shall advise the Materials and Research Division, in writing, that all materials or items used were approved for use on the basis of tests, field inspection, or that approval was given by the Highway Architect or Architecture Section for use.

A copy of this letter should be sent to the Highway Architect or Architecture Section.
