

**1003.00 WHITE PIGMENTED CURING COMPOUND AND HOT-POUR JOINT SEALER**

**1003.01 DESCRIPTION**

White pigmented curing compound and hot-pour joint sealer are sampled at the manufacturer's plant and tested in the Lincoln laboratory before being shipped to Nebraska. Test results for curing compound and joint sealer are on file on the computer. When either of these materials arrive at the construction site, it is necessary to identify the manufacturer and lot number of the material, then check the [Approved Products List on the Department's web-site](#) to verify that the material has been tested and approved for use on the project. The possibility always exists that untested material may be shipped to the construction site.

@

**1003.02 REPORTING MATERIAL USAGE**

If you use white pigmented curing compound and/or hot-pour joint sealer, Materials and Research needs to know. Send Terry Masters an e-mail note with product name, manufacturer, lot number, approval date and the quantity used.
