

810.00 SLOPE PROTECTION

810.01 SLOPE PROTECTION CHECKLIST

SSHC Reference: Section 810 -- Slope Protection & the Special Provision

Other References: None

Inspection Crew: Construction Technician

Inspection Equipment: Yard stick, meter stick and small balance scale

Procedures and General Comments:

1. The mulch must be prairie hay and certified as noxious weed free (*SSHC Subsection 810.02*)
2. The seed will be mixed at the seed company and tagged with department supplied tags
3. All areas possible are to have the seed drilled. The drilled seed will establish much faster than broadcast seed. The percentage of the area to be drilled is given in the Special Provisions.
4. Hay buster machines have proven to be satisfactory for the mechanical application of the mulch
- @ 5. Sampling for the proper weight of mulch per yd² or m². Use the meter stick or yard stick -- which ever applies - - and gather all the hay in a square before crimping -- and weigh this on the scale -- the results are approximate. Use them as a guide and not as an absolute
6. Best hay information -- Establish a test plot with the exact amount of hay per yd² or m² -- crimp -- and use this plot for a visual comparison
7. Questions -- call 402-479-4537, Roadside Development

Roadside Development
