

## **SECTION 1016 -- PREFORMED POLYCHLOROPRENE ELASTOMERIC JOINT SEALS**

### **1016.01 -- Description**

The seal consists of a multiple web design for sealing concrete pavements. The seal is installed with a lubricant adhesive and is designed to seal the joint and reject incompressibles.

### **1016.02 -- Material Characteristics**

Preformed polychloroprene elastomeric joint seals shall conform to the requirements of AASHTO M 220.

### **1016.03 -- Acceptance Requirements**

Acceptance shall be based on sampling and certification requirements in accordance with the NDR *Materials Sampling Guide*.

## **SECTION 1017 -- CAULKING COMPOUND**

### **1017.01 -- Description**

Caulking compound for use in masonry and other types of structures is a one-component oil and/or resin base compound or an acrylic latex compound.

### **1017.02 -- Material Characteristics**

1. One-component oil and/or resin base compounds shall conform to the requirements of ASTM C 570.
2. Acrylic latex compounds shall conform to the requirements of ASTM C 834.

### **1017.03 -- Acceptance Requirements**

Caulking compounds approved for use are shown on the NDR Approved Products List.
