

SECTION 1068 -- ELASTOMERIC BEARINGS AND LAMINATED BEARING PADS

1068.01 -- Description

Elastomeric bearings and laminated bearing pads shall conform to the requirements of the current AASHTO *Standard Specifications for Highway Bridges*.

1068.02 -- Acceptance Requirements

1. AASHTO tests required for the elastomeric material and steel shall be performed in an approved laboratory at no additional cost to the Department.
2. Test certification shall be furnished in accordance with the NDR *Materials Sampling Guide*.
3. In addition to the number of bearings and pads required for construction, one additional elastomeric bearing and laminated bearing pad shall be furnished for testing. The Engineer shall select one from those on the job for verification testing.
